## Consumer Notes:

The big seller this month is obvious: the X movie is coming, although only the dubbed version.. the DVD and subtitled version will follow in October. What's not so obvious is that there are a number of other products which may be overlooked that are streeting this month as well ... some of which would be significant news on any other month. Titles like the start of a Key: The Metal Idol DVD collection and the seriously underrated Please Save My Earth is supposed to ship on DVD this month as well! Were that not enough, there's a project by Hayao Miyazaki that doesn't get mentioned often these days (Panda Go Panda) which will become available this month, there's more Kimba and Imma Youjo and the first of Ruroni Kenshin ("Samurai X") tapes too. There's even a LA Blue Girl DVD box, more Gundam Wing and the first of the Tylor OVA series! Yep, it's a big month!

**JEFF'S PICK(S) OF THE MONTH**

I'd like to be bold and say that the new series of "Tylor" is great, even if it is a bit self serving. However, "X", "Ruroni Kenshin" (both the TV and OVAs) and new volumes of several series make this a strong month for anime, where you pretty much can't go wrong.
